Pest Management Solutions

COMPANY PROFILE

VIVA CROP SCIENCES INDIA PVT. LTD., an ISO 9001:2015 certified company, has been a trusted name in pest management since 2006. With a steadfast commitment to public health, hygiene, and safety, we specialize in the formulation, manufacturing, and supply of a wide range of professional-grade pest control solutions designed for residential, commercial, industrial, and public sector use.

Backed by over four decades of industry leadership, our promoters have played a vital role in building a portfolio of high-performance products—from vector control insecticides and domestic pest control agents to fumigants and rodenticides. Our advanced manufacturing unit in Dhaturi, Sonipat (Haryana) is equipped to produce a variety of formulations including emulsifiable concentrates (EC), suspension concentrates (SC), granules (GR), wettable powders (WP), and fumigant tablets, all tested to meet national and international quality benchmarks.

With a vision to elevate environmental and public health standards, we continue to innovate solutions that offer safe, long-lasting, and effective pest control. Whether combatting disease-carrying mosquitoes, termites in infrastructure, or protecting stored grains, our solutions are built to deliver reliability, efficacy, and compliance.

At the core of our growth lies a team of qualified entomologists, formulation scientists, and field professionals dedicated to providing integrated pest management strategies that are both science-driven and user-focused. As we expand our reach across India and globally, our mission remains clear: to offer sustainable, regulation-compliant, and performance-tested pest management solutions that help communities live healthier and businesses operate safer.

At Viva Crop Sciences India Pvt. Ltd., we understand that pests are not just an agricultural concern—they threaten public health, household hygiene, structural safety, food security, and industrial operations.

Our Pest Management Solutions are developed to address these diverse challenges through a scientific, safe, and regulatory-compliant approach. From controlling disease vectors like mosquitoes and flies in urban environments to protecting stored food grains in warehouses, our formulations are trusted by government health departments, pest control operators, facility managers, and logistics providers alike.

COMPREHENSIVE PROTECTION ACROSS SECTORS

- Public Health and Vector Control
- Storage and Commodity Fumigation
- Residential and Commercial Pest Control
- Rodent Management
- Industrial and Structural Pest Management

SERVING DIVERSE END USERS

- Government Health Agencies
- Urban Local Bodies & Municipalities
- Pest Control Service Providers
- Hospitality and Food Industry
- Warehouse and Cold Storage Operators
- Shipping and Cargo Agencies
- Households and Residential Communities

VIVA's ADVANTAGE

- Customizable Pack Sizes for institutional, retail and export requirements.
- In-house R & D to address region-specific pest issues.
- Technical guidance & training for safe and effective application.
- Commitment to eco-friendly practices and compliance with national & international regulations.

OUR KEY PRODUCTS

Over the years, Viva Crop Sciences India Pvt. Ltd. has developed a strong reputation for delivering highly effective, safe, and reliable pest control products tailored for public health, household, industrial, and storage applications. Our key products are backed by scientific research, regulatory compliance, and field-proven efficacy across diverse pest management operations. These formulations are engineered to combat some of the most persistent and dangerous pests affecting human health, food safety, and infrastructure integrity.

KILLPHOS

Temphos 50% E.C.

- **Effective Larvicide** for controlling mosquito larvae (Aedes, Anopheles, Culex) in stagnant water bodies
- **Ideal for public health use** in fountains, drains, ponds, and breeding sites
- **Emulsifiable Concentrate (EC)** formulation ensures even distribution in water
- **Long-lasting residual action** reduces frequency of application
- **Safe for non-target organisms** when used as recommended
- **Helps break the mosquito life-cycle**, thereby controlling vector-borne diseases like dengue, malaria, and filariasis

VEGENT SC

Fipronil 5% S.C.

- Broad-spectrum systemic insecticide with contact and ingestion action
- Provides effective control against sucking pests like thrips, jassids, and whiteflies
- Ideal for use on vegetables, cotton, and other horticultural crops
- Long residual effect ensures prolonged protection of crops
- Suspension Concentrate (SC) formulation offers better coverage and rainfastness
- Disrupts pest's central nervous system, leading to quick knockdown
- Aids in enhancing crop health and yield by reducing pest stress

VIVACYP-10

Cypermethrin 10% E.C.

- Fast-acting insecticide for effective control of household and industrial pests
- Targets cockroaches, ants, flies, mosquitoes, spiders, and other crawling & flying insects
- Suitable for use in homes, offices, hotels, hospitals, factories, warehouses, and food storage areas
- Provides quick knockdown and long-lasting residual action
- Emulsifiable Concentrate (EC) ensures uniform spray application on surfaces
- Can be applied on walls, floors, cracks, and crevices where pests hide

VAXCIS

Deltamethrin 2.8% E.C.

- Highly effective pyrethroid-based insecticide with quick knockdown and residual control
- Controls a broad spectrum of flying and crawling insects including mosquitoes, flies, cockroaches, ants, and bedbugs
- Ideal for use in residential spaces, healthcare facilities, hotels, commercial kitchens, and storage areas
- Low odor and non-staining formulation suitable for indoor application
- Offers long-lasting residual effect on treated surfaces such as walls, cracks, and crevices
- Safe when used as directed, ensuring protection without compromising hygiene
- Helps prevent the spread of vector-borne diseases by targeting pests at their source

CHLOREX-TC

Chlorpyrifos 20% E.C.

- Broad-spectrum insecticide for effective control of termites, ants, and cockroaches
- Ideal for pre- and post-construction termite control in residential, commercial, and industrial buildings
- Suitable for soil treatment, wood protection, and foundation barriers
- Offers long-lasting residual action, protecting structures from pest infestation
- Helps safeguard buildings, wooden fixtures, and storage facilities from damage caused by termites and other crawling pests

MALATHION-V

Malathion 50% E.C.

- Broad-spectrum insecticide for controlling mosquitoes, flies, cockroaches, and other public health pests
- Widely used in fogging and space spray operations by municipal bodies and pest control agencies
- Ideal for use in residential areas, hospitals, hotels, warehouses, and public spaces
- Low mammalian toxicity makes it suitable for use in sensitive areas
- Provides quick knockdown and moderate residual effect
- Helps prevent outbreaks of vector-borne diseases like malaria, dengue, and filariasis

ALTRON SC

Alphacypermethrin 10% S.C.

- Highly potent synthetic pyrethroid for control of crawling and flying insects
- Effective against mosquitoes, houseflies, cockroaches, ants, and bedbugs
- Ideal for indoor residual spraying (IRS) in homes, hospitals, hotels, and public health programs
- Suspension Concentrate (SC) offers better coverage, low odor, and longer residual efficacy
- Helps reduce transmission of vector-borne diseases like dengue, malaria, and chikungunya
- Suitable for use on walls, ceilings, and hard surfaces

V-PROXUR

Propoxur 20% E.C.

- Carbamate-based insecticide with rapid knockdown and contact action
- Effective against cockroaches, ants, flies, mosquitoes, and other household pests
- Suitable for use in homes, commercial kitchens, hospitals, hotels, and public buildings
- Ideal for residual surface spraying on walls, cracks, crevices, and infested areas
- Offers quick action with moderate residual control
- Helps maintain hygienic and pest-free environments in sensitive spaces

ANCHOR PLUS

Imidacloprid 30.5% S.C.

- Advanced neonicotinoid formulation for effective control of termites and household pests
- Ideal for pre- and post-construction anti-termite treatment in residential and commercial buildings
- Works through systemic and contact action, disrupting the pest's nervous system
- Suspension Concentrate (SC) ensures deep penetration and long residual effect
- Suitable for use in soil barriers, wooden structures, and wall treatments
- Provides long-lasting protection against termite damage to buildings and furniture

OUR FORMULATIONS

- | Alphacypermethrin 5% SC
- | Alphacypermethrin 10% SC
- | Alphacypermethrin 10% WP

- | Bifenthrin 2.5% EC
- | Bifenthrin 10% EC

- | Bromadiolone 0.005%
- | Betacyfluthrin 8.49% +
| Imidacloprid 19.8% w/w OD

- | Chlorpyriphos 20% EC
- | Chlorpyriphos 50% EC
- | Chlorpyriphos 2% RTU

- | Cypermethrin 10% EC
- | Cypermethrin 25% EC

- | Deltamethrin 1.25% ULV
- | Deltamethrin 2.8% EC
- | Deltamethrin 2.8% SC
- | Deltamethrin 2.5% Flow

- | Diflubenzuron 2% Tablet

- | Fipronil 2.9% EC
- | Fipronil 2.15% Gel
- | Fipronil 5% SC

- | Imidacloprid 30.5% SC
- | Imidacloprid 2.15% Gel

- | Lambda Cyhalothrin 2.5% EC
- | Lambda Cyhalothrin 5% EC
- | Lambda Cyhalothrin 10% WP

- | Malathion 50% EC

- | Permethrin 25% EC

- | Propoxur 20% EC
- | Propoxur 2% Aerosol

- | Thiamethoxam 25%WDG

- | Zinc Phosphide 80% WP
- | Zinc Phosphide 2% RB

For Weed Control (Herbicide)

- | Glyphosate 41% SL

WHY CHOOSE VIVA CROP SCIENCES ?

EXCELLENCE BEYOND FORMULATION

At Viva Crop Sciences India Pvt. Ltd., we don't just manufacture pest control products—we deliver confidence, consistency, and compliance. With a legacy built on science, service, and sustainability, we are trusted by health authorities, pest control professionals, commercial operators, and distributors across India and beyond.

With roots dating back to 2006 and leadership with over 40 years of experience, Our Company is built on deep technical expertise and real-world understanding of pest challenges in urban, industrial, and public health sectors.

PROVEN INDUSTRY LEGACY

STATE-OF-THE-ART MANUFACTURING

Our certified manufacturing facility in Dhaturi, Sonipat (Haryana) is equipped to produce advanced formulations including EC, SC, WP, GR, and fumigants. Every batch undergoes rigorous quality checks, ensuring safety, stability, and field performance.

From vector control and fumigation to termite barriers, rodent control, and household sanitation, Viva offers end-to-end pest solutions that cater to government tenders, commercial contracts, and retail markets alike.

COMPLETE PEST MANAGEMENT PORTFOLIO

STRONG DISTRIBUTION AND EXPORT CAPABILITY

With a wide network of channel partners, government buyers, and international clients, Viva has the infrastructure to deliver consistently across urban centers, rural regions, and international markets.

We are continuously investing in eco-conscious formulations, safer hives, and resistance management strategies to align with global trends in sustainable pest control.

COMMITMENT TO INNOVATION AND SUSTAINABILITY
